

Brivio Capital

Enabling Any Company to Create their
Own Auto Lender · Seed Round

Charles Do
CEO
charles.do@briviocapital.com

THE OPPORTUNITY

Automakers and dealers want their own lending arm

Tangible benefits of in-house lenders

Own brand experience

Every interaction reinforces the brand, from origination to repayment

Retain economics

Control the keys to monetize the loan economics and vertically integrate

Compound data

Accumulate and consolidate customer portfolio data to drive the next sale

Automakers built in-house lenders 50+ years ago

WHY AUTO DEALERS ARE INTERESTED NOW

New-vehicle margin has declined since post-COVID peak

Source: Presidio-NCM

Dealer margin on the car is compressing ... higher margins on the loan are still available

THE BARRIER

Building a lender requires standing all of this up

... before the first loan funds – 20+ functions, each requiring a hire, vendor or license

Regulatory	State licenses	Exams & renewals	Fair lending	Repossession rules	Audit function
Underwriting	Credit policy	Scorecards	Pricing	Fraud & identity	Loss forecasting
Loan Servicing	Customer portal	Title servicing	Collections	Repossession network	Remarketing
Capital Markets	Warehouse line	Backup servicer	Forward-flow buyers	Whole-loan take-out	Risk structuring

Highlighted: difficult to stand up and only gets good at scale

Only the very largest dealer groups could buy their way in ... everyone else has had no path to one

SOLUTION

Fully branded, lender-in-a-box

Productize core auto lending capabilities, while enabling a customized capital markets layer

Brivio builds and operates

20+ functions — licensed, staffed and operated

 **Regulatory** licensing, exams, fair lending, audit

 **Underwriting** pricing, credit policy, risk models

 **Loan servicing** payments, collections, title, repo

 **Capital markets** warehouse, forward flow, take-out

The dealer owns

- **The brand on the loan**
Financing under the dealer's name, not an outside lender's
- **The customer relationship**
Every touchpoint, from approval through payoff
- **The majority of loan economics**
Interest margin and fee income stay in-house
- **The data every loan generates**
Credit and marketing signal that sharpens the next sale

Brivio earns a platform fee plus a share of program economics

BUSINESS MODEL

What these backgrounds let us do

- **Say yes where a bank says no ... and know when not to**
the sale, the trade, the next purchase
- **Carry someone else's brand as if it were ours**
Harley-Davidson, JLR, Subaru
- **Price and structure to win the deal**
\$50bn priced where 5-10bps decides
- **Automate the friction, never the compliance**
fintech speed, lender's discipline

COMPETITIVE LANDSCAPE

Existing auto lenders have little incentive to serve market

While newer entrants lack specific expertise

MARKET OPPORTUNITY

Dealer groups control \$850bn+ auto finance market

The \$2bn bottoms up

27	dealer groups signed by Year 3
7-10	locations per dealer group (variability in group size)
100	vehicles sold per location each month
18%	financed through the dealer's own lender
\$34.4k	average loan amount

Target band is 3-25 locations; the 6-25 cohort averages 11.1. The model assumes 9.8 per group, a blend that includes 3-5 location groups.

Top of the range matches the financial model.

Under 300 rooftops to reach \$2bn of annual originations

Each lending license and customer unlocks the next tier

Start where licensing is easiest or fastest with dealers willing to co-build

Target	Strategy	Dealer Groups on Platform (cumulative)	
Year 1 3–10 location groups, warm relationships	Launch in fast-license, higher-population states	2	~15 to 20 locations
Year 2 10+ location groups in Tier 1 states	Expand inside launched groups; license Tier 2	12	~100 to 120 locations
Year 3 Multi-state groups, 5+ states	Complex, multi-state licensing now reachable	27	~265 locations

27 groups by Yr 3, under 2% of US franchised dealer groups ... Active discussions with several dealer groups

TRAJECTORY

\$19mm in year 3 revenues, EBITDA positive in year 2

Total Revenues (\$mm)

Year 2
EBITDA positive

\$1.0bn
Servicing assets at end of Year 3

~4x revenue
Per dealer group from Yr 1 → Yr 3

Loan originations	\$28mm	\$274mm	\$963mm	\$1.4bn
EBITDA	(\$2.1)mm	\$0.1mm	\$9.2mm	\$16.3mm

Year 1 is first year of operations; build costs of \$0.6mm before product launch

Embedding AI into business using a three-phased approach

Deliberate planning to extract maximum operational efficiency

Target: operate with half the headcount of a conventional lender at scale

Thank you
